

SQL Server DBA (Database Administrator)

Mosaic Island, a leading digital business transformation consultancy are working with numerous customers in the Not-for-Profit and Media sectors.

We are currently working on one particularly exciting and high-profile programme of work which aims to deliver business transformation in several areas of our customer's business.

As a result, we are looking for a highly skilled SQL Server DBA to work as part of our wider delivery team on an AWS Migration project.

Key Skills:

- SQL server DBA (has MS accreditations)
- Evidence of experience as a lead DBA; managing databases in enterprise deployments
- Migration of databases to cloud (AWS) and understands 'AWS database' options
- Migration of business-critical databases – i.e. CRM / customer data with 1+ Terrabytes of data in it
- Awareness of data security / sensitivity
- Can define AWS target database capability
- Has delivered database migration strategies and has planned and migrated this
- Has managed other aspects – management of DB, failover, replication, reporting services.
- Can specify / assess performance and optimise / address performance issues of databases
- Good communicator / documents as well
- Sensitive to org issues whilst delivering this project

This role will be a 50/50 split between Bristol and London so flexibility to work across both is essential.

This role is an immediate requirement and rates will be highly competitive along with opportunity to work on a long-term engagement (6 Months +).

Mosaic Island is an equal opportunity employer and is determined to ensure that no applicant or Employee receives less favourable treatment on the grounds of gender, age, disability, religion, belief, sexual orientation, marital status, or race, or is disadvantaged by conditions or requirements, which cannot be shown to be justifiable.
